

CLEERPLUS®

For small wounds and blisters

Another smart idea from Sweden
www.cleerplus.com

What is CleerPlus®?

Developed in Sweden, CleerPlus® is a clear gel designed to discreetly treat cold sores and facilitate the healing process. CleerPlus® is based on a patented ethanol-based formulation, is CE labelled and approved for use throughout the EU as a Class IIa medical device.

How does it work?

CleerPlus® forms a bubble that dries, leaving a moisture retaining and protective cellulose film over the affected area. This moist environment facilitates healing while reducing the risk of contamination. The film has proven itself impermeable for particles of a similar size to viruses and bacteria, acting as a barrier to protect against dirt and micro-organisms. We recommend using CleerPlus® on cold sores at the earliest possible stage.

Who can use it?

Anyone over 4 years of age can use CleerPlus®. However, please keep in mind:

-  Be aware of any possible allergies.
-  Avoid contact with eyes.
-  Children between the ages of 4-12 should not apply the gel themselves.

How is it used?

-  Clean the area to be treated.
-  Apply a drop of CleerPlus® so that a 2-4 mm high gel bubble covers the affected area.
-  Avoid touching the bubble while it dries.
-  After a couple of minutes – depending on the amount used – a flexible film will have formed over the wound/blister/bite.
-  CleerPlus® can be applied up to 8 times per day.

Other areas of use

CleerPlus® provides simple and discreet treatment for cold sores. However, it has also proven to be useful in other areas; CleerPlus® is also approved for the treatment of small wounds, blisters and bites and stings by insects such as mosquitoes, wasps and ticks.

Ingredients

CleerPlus® contains the following ingredients: cellulose, ethanol and mint oil.

CleerPlus® Testimonials

"I have suffered from cold sores for years and have used many products with little success. CleerPlus® had an immediate effect and all the blisters were gone within a few days. My lips had totally recovered within a week. From now on I will always carry CleerPlus® with me"

– Peter

"Under an intense sun, during a photo safari in South Africa, I developed a sun burn on my ear. A small wound formed that just would not heal and resurfaced time after time. After having tried many different creams and ointments for 6 months I learned about and tried CleerPlus®. After a week the wound was gone"

– Peer

"Some time ago I found a strange growth on my forehead. After a while a small sore developed that would not heal. I decided to try CleerPlus® and within a few days the crust fell off without leaving any scar behind. Very impressive!"

– Claes

"As soon as I have an infection I get a cold sore. I have tested over-the-counter products from the pharmacy without success. I tried CleerPlus® and felt the gel penetrate the cold sore immediately. Within a few days the cold sore was gone. Finally, there is a product that works for me!"

– Ida

I need something for a cold sore, what can you recommend?

CleerPlus® is a new gel that works by protecting the affected area. It's transparent and not as visible as other products and at the same time an effective treatment. In addition CleerPlus® smells good.

This small wound will not heal, it's been there for quite some time. It's so small and I cannot understand why it will not disappear.

CleerPlus® is developed for treatment of cold sores and is also indicated for small wounds and blisters. Apply a bubble on the wound and let it dry so a protective film will form covering the treatment area. You can use CleerPlus® several times a day until the wound is healed.

Are there any risks with side-effects when using CleerPlus®?

The risk is very small. CleerPlus® contains only cellulose, ethanol and mintoil. They are well-known substances with very few side-effects. There are a few persons that are hypersensitive to mintoil (limonene).

I got this rash after a tick bite, do you have anything that can relieve the irritation?

The first advise should be to talk to your doctor. It's important not to miss any potential secondary disease due to the tick bite.

Yes, try CleerPlus® it can help. Next time you get a tick bite use CleerPlus® immediately to avoid irritation and swelling.

Do you have any really good multipurpose product that is good for incidents when travelling? I'm planning a trip and don't want to carry many different products.

CleerPlus® is a gel that was developed for cold sores and is also indicated for treatment of small wounds, blisters. Many people also use CleerPlus® for insect bites and chaps.
